

7000 Series
Style and sophistication

Style and sophistication

The stylish and innovative 7000 series digital handsets, available in Black or Ivory, successfully deliver the ergonomics and functionality you need for efficient business communications in your office.

The range of handsets extends to 6 models; building from the cost effective, 4 button non-display, all the way to the fully featured 24 button large display, and complemented by USB & Bluetooth modules to link seamlessly to the ipLDK systems advanced applications.

The ipLDK Range offers a multitude of telephony features, but this is only productive if these are translated into easy to use functionality at the user handset.

The ipLDK system range and handsets have been designed from a user perspective. Features are logical, easy to use and remember.

So, if it's easy operation you require, such as one-touch transfer or paging, or even more advanced functionality to enhance the competitive edge of your business, such as VoIP, networking, Computer Telephony Integration (CTI) the ipLDK Range is the solution.

The 7000 series handsets are a perfect marriage of form and functionality, delivering technology to your desktop in a stylish yet simple to use format.
