

Nexer
The Integrated Office

Big features for small businesses

Convergence as a concept is brought to life in the LG-Nortel Nexer system. With a maximum capacity of 8 Exchange Lines and 20 Extensions, the Nexer is ideal for the small business or branch Office.

The Nexer is an IP-enabled PBX, built to support Voice Over Internet Protocol (VoIP) whilst continuing to provide all the facilities, features and reliability of a more traditional business telephone system. The Nexer VoIP will integrate seamlessly with all the systems in the ipLDK Range, making it the logical choice for a growing company.

The powerful Nexer system is built on revolutionary technology that provides features such as VoIP, Networking, Bluetooth, Computer Telephony Integration (CTI), USB connectivity and more.

As part of the LG-Nortel range of ipLDK systems, the Nexer delivers virtually all of the telephony functionality of the larger systems and unique data functionality, making it the most advanced communication tool for your business in today's competitive environment.

Nexer integrates standards based communication hardware and software with advanced data switching technology in a single platform, designed for scalability, reliability and ease of use. It is supported by full-featured LAN and multi-protocol ADSL router and a suite of communications applications.

Broadband

VoIP enabled

Secure firewall

Built-in LAN

Voice messaging

ADSL Router

As well as the stylish and innovative 7000 series digital handsets, the Nexer also supports an integrated (GAP compatible) DECT solution, freeing you from your desk, and increasing productivity.

Presenting your business to your customers is all important, so the Nexer with its Automated Attendant functions, Call Centre features with comfort messaging, and integrated Voice Mail board will demonstrate the professional edge you want to portray.
